Foes of CIA Recruiter Face Brown Discipline

CPYRGHT

Disciplinary action is to be started immediately against Brown University students who prevented a Central Intelligence Agency representative from conducting interviews on campus yesterday morning, Dr. Ray L. Heffner, university president, said last night.

Dean Michael J. Brennan of the graduate school said he had taken names of "10 or 12" of the approximately 20 demonstrators who blocked the interviewer's entrance. Dr. Heffner said it is university policy not to disclose names of students involved in disciplinary proceedings.

The demonstrators blocked entrance to an office in the university placement bureau that had been reserved for the interviews. They refused to move after Dean Brennan told them they could be dismissed from college if they persisted in their actions.

The interviewer, James W. Gurll Jr., a 1938 Brown alumnus and former alumni fund director at the university, made no attempt to wade through the demonstrators. Six students had made appointments for interviews with Mr. Gurll.
